

## READYMADE WOOD SIGN

Select your framing, panel and fixings.

### FRAMING

- **Hardwood** - European Oak (100% FSC Certified)
- **Softwood** - Redwood

### PANEL

- White 3mm aluminium composite face with ply core
- Solid 9mm plywood

The wooden frame will be supplied untreated and will either need to be painted or treated with oil/wax if using externally.

For external use you will also need to apply a bead of sealant between the edge of the frame and the panel once signwritten using a silicone sealant such as our TIMCO Multi-Fix Universal Adhesive & Sealant to prevent water getting between the panel and frame (apply prior to painting or after oiling/waxing).

### RECOMMENDED FIXINGS

#### Single sided sign -

- HD Easy Hangers or Button Fix

#### Double sided hanging sign -

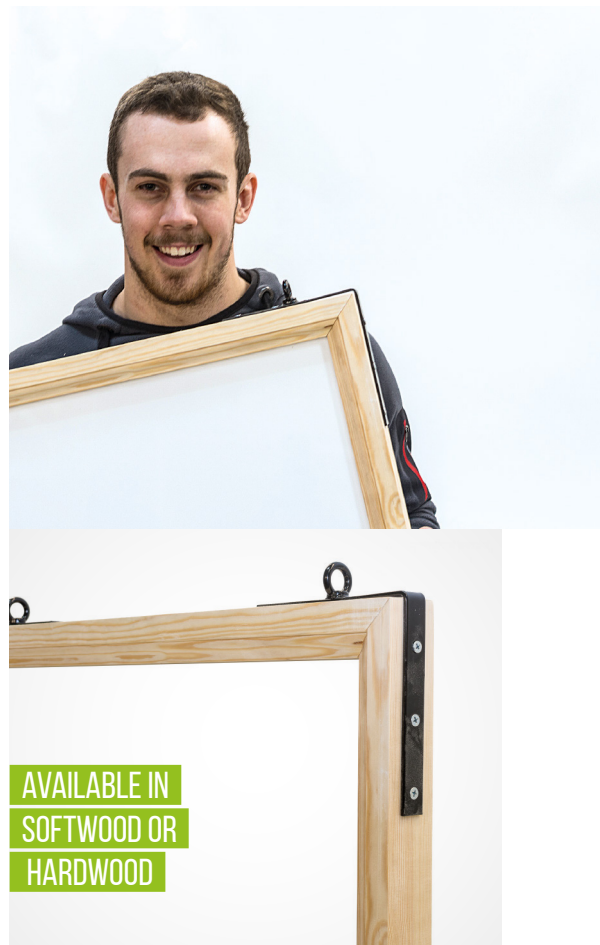

- HBSE Hanging Bracket (recommended board width to fit this size bracket 630mm)

#### Universal Corner Bracket Standard (Black or white)

#### Adjustable Universal Corner Bracket (Black or White)

Repositionable stainless steel eye that allows you to adjust the eye into any one of 10 positions spaced every 20mm across the top bar to align with almost any existing hanging bracket.

**Zinc Plated Mild Steel Quicklinks** - A quick, effective and secure way of suspending many types of hanging signs.

*All made to order*
