

# Fitting signs to Palisade fencing

When Fence Fix is unsuitable you can fit to Palisade fencing by using self drilling screws through the signage and fence. A method to avoid visible fixings, using our Sign Channel can be found below . . .

**1**  
Prepare panel with channel, cut and drilled flat bar and M8 nuts, bolts and washers

**2**  
Slide the bolt heads into the channel, place the sign against the fence and position the bolt heads

**3**  
Position the flat bar over the bolts on the other side of the fence as shown

**4**  
Place the washer under the nut and tighten to hold the panel in place

**5**  
Repeat the process with the bottom run of channel to secure your sign
