## THE MBX® VINYL ZAPPER® ULTIMATE ADVANTAGES

The patented Ultimate Zapper® has been specially engineered for vinyl and adhesive removal with powerful, battery-operated technology from the manufacturers of the Original renowned MBX Vinyl Remover.

Expect to remove 3.25-4.65 sqm (35-50 sqft) per hour with this tool.

The MBX Vinyl Zapper range removes the vinyl and adhesive residue in one hit. The patented design wheels have rubber or silicone teeth designed to grip and pull the vinyl away from the substrate, unlike other solid wheels on the market which 'sand' the surface, creating heat and carrying a higher risk of damage to the substrate. The patented notch fingers provide flexibility and increased air flow to the surface avoiding heat build up.

The revolutionary Ultimate Vinyl Zapper with its silicone erasure wheels further reduces the amount of waste deposits, is cordless, and it's wheels last up to 8x longer than the original Vinyl Zapper.

The Ultimate Zapper is perfect for use in any areas where power supply is limited or non-existent, or where minimal mess and clear up is required when removing vinyls and adhesives while ensuring that the paintwork is left with no heat damage or smearing.

- ▶ The unique wheel with angled fingers provides a grab and peel effect on the vinyl to lift it from the surface. Designed to quickly and effectively remove:
- ▶ Vinyl  
Paper posters  
Adhesive residue  
Stickers  
Double-sided adhesives  
Tapes  
Reflective vinyls
- ▶ Suitable for use on a number of substrates including factory finished vehicle paintwork, metal surfaces, bright metals, wood and aluminium
- ▶ No vibration or jumping = reduced operator fatigue
- ▶ Quick click and go adapter feature allows wheel changes in seconds
- ▶ Silicone wheel lasts up to 8x longer than the traditional toffee wheel
- ▶ One single 8.0ah battery provides 25+ minutes operation time - keep extra batteries with charge for quick change and extended working times
- ▶ The battery pack at the base of the machine rotates 360 degrees to allow flexible working in almost any space
- ▶ Lithium-ion Fast Battery Charger 12-36V is air cooled and charges one battery at a time
- ▶ Charge time for 8.0Ah battery approx 60 minutes
- ▶ Components can be purchased separately or as a set
- ▶ The Ultimate set includes one Ultimate Zapper® drive unit, a 30mm silicone erasure wheel and MONTI EasyLock-Adaptor Hub, 2 x Battery LIHD 18 V, 8.0 Ah, Battery Charger & Hard Carry Case
